Election/Restrictions

1. This amendment filed 2/20/2007, with respect to claims 19-30,34,36-39,41-49,51-56,57-59,69,72-91,95,97-98 are acknowledged. However, upon further consideration, new restriction is made below.

2. This application contains claims directed to the following patentably distinct species. **The species of 1 in figures 1-2; the species of 2 in figure 3; the species of 3 in figure 4; the species of 4 in figures 5-7; the species of 5 in figures 8-9; the species of 6 in figures 10-12; the species of 7 in figure 13; the species of 8 in figure 14; the species of 9 in figure 15; the species of 10 in figure 16; the species of 11 in figure 17; the species of 12 in figure 18; the species of 13 in figures 19-20; the species of 14 in figure 21; the species of 15 in figure 22; the species of 16 in figure 24; the species of 17 in figure 25; the species of 18 in figures 27-29; the species of 19 in figure 32; the species of 20 in figure 34; the species of 21 in figure 35; the species of 22 in figure 36; the species of 23 in figure 37; the species of 24 in figure 38; the species of 25 in figure 39; the species of 26 in figure 41.**

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, **no claims appear to be generic.**

Art Unit: 3734

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3734

examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
